

## CRITICAL APPRAISAL SUMMARIES:

### - ROB2 Bar graph:

### - ROB 2 Traffic Lights:

|       |               | Risk of bias domains |    |    |    |    |         |
|-------|---------------|----------------------|----|----|----|----|---------|
|       |               | D1                   | D2 | D3 | D4 | D5 | Overall |
| Study | Stepanova2018 | +                    | -  | +  | -  | +  | -       |
|       | Campbell2006  | +                    | -  | -  | -  | +  | -       |
|       | Macken2020    | +                    | +  | X  | +  | -  | X       |

Domains:  
D1: Bias arising from the randomization process.  
D2: Bias due to deviations from intended intervention.  
D3: Bias due to missing outcome data.  
D4: Bias in measurement of the outcome.  
D5: Bias in selection of the reported result.

Judgement  
X High  
- Some concerns  
+ Low

### - ROBINS-I:

### - ANALYTICAL STUDIES:

| STUDY ID | Were the criteria for inclusion | Were the study subjects and the | Was the exposure measured in a | Were objective, standard criteria used for | Were confounding factors identified? | Were strategies to deal with confounding | Were the outcome measures | Was appropriate statistical |
|----------|---------------------------------|---------------------------------|--------------------------------|--------------------------------------------|--------------------------------------|------------------------------------------|---------------------------|-----------------------------|
|----------|---------------------------------|---------------------------------|--------------------------------|--------------------------------------------|--------------------------------------|------------------------------------------|---------------------------|-----------------------------|

|             | n in the sample clearly defined? | setting described in detail? | valid and reliable way? | measurement of the condition? |     | ng factors stated? | d in a valid and reliable way? | analysis used? |
|-------------|----------------------------------|------------------------------|-------------------------|-------------------------------|-----|--------------------|--------------------------------|----------------|
| Kieffer2022 | Yes                              | Yes                          | Yes                     | Yes                           | Yes | Yes                | Yes                            | Yes            |

## - COHORT STUDIES:

| STUDY ID    | Were the two groups similar and recruited from the same population? | Were the exposures measured similarly to assign people to both exposed and unexposed groups? | Was the exposure measured in a valid and reliable way? | Were confounding factors identified? | Were strategies to deal with confounding factors stated? | Were the groups/participants free of the outcome at the start of the study (or at the moment of exposure)? | Were the outcomes measured in a valid and reliable way? | Was the follow up time reported and sufficient to be long enough for outcomes to occur? | Was follow up complete, and if not, were the reasons to loss to follow up described and explored? | Were strategies to address incomplete follow up utilized? | Was appropriate statistical analysis used? |
|-------------|---------------------------------------------------------------------|----------------------------------------------------------------------------------------------|--------------------------------------------------------|--------------------------------------|----------------------------------------------------------|------------------------------------------------------------------------------------------------------------|---------------------------------------------------------|-----------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------|-----------------------------------------------------------|--------------------------------------------|
| Kaur2024    | Yes                                                                 | Yes                                                                                          | Yes                                                    | Yes                                  | No                                                       | No                                                                                                         | Yes                                                     | Yes                                                                                     | Yes                                                                                               | Yes                                                       | Yes                                        |
